#### TaylorMade r7 Iron

Engineered for skilled players who prefer an iron that's easier to launch high and straight while also offering excellent workability.

Inverted Cone Technology provides higher COR and increased average ball speed for greater distance.

Exceptionally deep cavity design creates a low and deep CG, making it easier to launch the ball higher for the optimum combination of carry and control.

Moderate offset promotes a square clubface at impact, equaling increased ball control for increased accuracy.

TaylorMade logo grip features hundreds of extremely short slots, positioned parallel to the line of the shaft, that deliver increased feel, comfort and traction.
